Summary

Full Stack Software Engineer with 2+ years of commercial experience in fintech and logistics, working with React, TypeScript, GraphQL, Node.js and AWS serverless. Frontend mentor at Mancho School.

Experience

- **Mancho Devs** — Bishkek, Kyrgyzstan (on-site)
  Full Stack Software Engineer — *09/2024 – Present*
  - **Full-stack development**: Develop web apps and admin panels for 5 company products: frontend with React and Gatsby, backend with Node.js, GraphQL and AWS; design APIs and data models.
  - **Testing and releases**: Write unit, component and E2E tests (Jest, React Testing Library, Cypress), maintain CI/CD in GitHub Actions and investigate production incidents using AWS CloudWatch logs.
  - **Onboarding**: Onboarded a new frontend developer to the umrahhajj project and reviewed their pull requests.
- **Mancho School** — Bishkek, Kyrgyzstan
  Frontend Mentor — *09/2024 – Present*
  - **Mentoring**: Taught frontend to 20+ students through lectures, workshops, code review and project support.
- **MEGA (Alfa Telecom CJSC)** — Remote
  Frontend Developer Intern — *03/2023 – 05/2023*
  - **Frontend**: Built features for a large telecom company's product with React and TypeScript.
- **Oigonuu NGO** — Kyrgyzstan, remote
  Frontend Mentor (volunteer) — *03/2022 – 08/2022*
  - **Volunteering**: Taught HTML, CSS and JavaScript to young people from villages who needed support.

Projects at Mancho Devs

- **Finik** | *React, TypeScript, Node.js, GraphQL, Redux, RxJS, AWS* — *fintech payment platform*
  - **Admin panel**: Built modules for transactions, accounts, users, Finik Items, access rights and cash collection; implemented tables with filters, search, batch operations, statistics and RBAC.
  - **Backend**: Implemented commission filtering by fee type (flat, percentage, dynamic tiers) in DynamoDB queries and fixed the opening and closing balance calculation in OpenSearch statistics.
  - **Documentation**: Built a documentation site for the Payments Gateway and Web SDK in three languages (RU/KY/EN) with Gatsby and MDX: sequence diagrams of payment flows and interactive code examples.
  - **Web SDK**: Helped merchants and their developers integrate the Finik Web SDK (QR codes, bank-app deep links).
- **umrahhajj** | *React, TypeScript, Apollo, RxJS, Styletron, AWS AppSync* — *Hajj and Umrah platform*
  - **MVP launch**: Shipped the MVP in about 3 weeks by rewriting Finik components in Styletron.
  - **Applications and payments**: Built the applications section (sorting, filters, detail screens) and a payment card with deposit progress, using Apollo Client (cache-and-network) and RxJS epics.
- **SlonExpress** | *React, Gatsby, Node.js, AWS Lambda, Cognito, S3* — *international logistics*
  - **Product launch**: Took the platform to MVP and kept building it: React, Node.js, AWS Lambda, API Gateway.
  - **Admin panel**: Implemented management of users, parcels, orders and warehouses: account verification, passport data and multi-country addresses.
  - **Infrastructure**: Fixed missing styles in production (FOUC in Styletron); set up S3 Cache-Control, CI/CD in CodePipeline and a branded Cognito email.
- **Other projects** | *Bitok.kg, Mancho company website*
  - **Bitok.kg**: Fixed crypto exchange bugs in balances, fees and exchange rate calculation.
  - **Mancho website**: Maintained the trilingual company site (RU/KY/EN): UI, responsive layout and animations.

Education and Courses

- **Mancho School** | *Software Engineering* — *09/2023 – 06/2024*
  Stack: React, Gatsby, Redux, RxJS; Flutter, Bloc; Node.js, AWS (Lambda, DynamoDB, Cognito)
- **U.Skill.Z** | *Frontend Web Developer, UI Frontend Engineer certificate* — *07/2022 – 12/2022*
  Stack: JavaScript, TypeScript, Vue.js 2/3, Vuex, React, Redux, REST API
- **OKUU IT** | *Frontend Web Developer* — *11/2021 – 02/2022*
  Stack: JavaScript, HTML, CSS

Skills

- **Programming languages**: TypeScript, JavaScript, Dart.
- **Frontend**: React, Gatsby, Apollo Client, Redux, RxJS, Styletron, HTML, CSS/SCSS, responsive design.
- **Backend**: Node.js, GraphQL, API and data model design, role-based access control (RBAC); AWS (Amazon Web Services): AppSync, Cognito, IAM, Lambda, API Gateway, DynamoDB, S3, CloudFront, CloudWatch, OpenSearch, EC2, EventBridge, CloudFormation, CodeCommit, CodeBuild, CodePipeline, Route 53.
- **Testing and tools**: Jest, React Testing Library, Cypress, Git, GitHub Actions.

Languages

Kyrgyz and Russian: fluent. English: A2 (elementary).
